Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Ameen et al. (6,635,569).

The process as claimed is disclosed at col. 5, lines 1-30, col. 9, lines 1-34, and col. 10, lines 55-60 wherein the chamber is cleaned with NF_3 , a plasma of Ar and H_2 is used to remove contaminants and stabilize the temperature of the showerhead for 1-10 minutes, Ti is deposited on the reaction chamber without a substrate in the chamber, and the Ti film is subjected to a stabilization process 50 which can include introduction of N_2 and H_2 gas in the chamber.

Claims 1, 2, 4, 7-9, 11, and 13-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Gupta et al. (5,824,375).

The process as claimed is disclosed at col. 8, line 37 to col. 9, line 60 where the chamber is cleaned with NF_3 , a plasma of He and Ar is introduced into the chamber

which stabilizes and removes contaminants, and a silica film is deposited on the reactor without a substrate therein. As to claim 11, the reactor is idled during the cleaning steps as the intended purpose of the chamber of depositing layers on substrates is not being performed during this time. As to claim 16, the example describes a 90 second cleaning process.
